

600S™ Software Update Details

Version: 600S GPS Update
Release Date: 12/09/16

Download and Installation Instructions

Download and installation instructions are included in the update package.

Start with the 600S receiver unplugged from power & connect computer to 600S cable on Port A or Port B

Note: Port A & Port B are direct connect to the GPS board. Unlike the P300 the 600S has it's own port for RTK so if you have an RTK unit you can still update through either port and not switch the configuration first

Items you will need

1. Downloaded software package
2. USB to serial adapter

Release Notes

Full release notes included in software package.
