

SMARTYIELD PRO RELEASE NOTES

VERSION 2.01.14

1. Added support for a moisture sensor in the bubble up auger. This will require a rev B SmartYield Pro node.
2. Added advanced filtering for detecting grain on a paddle. Helps solves the loose elevator chain issue. This greatly improves yield accuracy on problem combines.

VERSION 2.01.08

1. Removed alarms for Demo mode.
2. Production support modifications.

VERSION 2.01.07

1. Implemented alarms (check tare, tilt, header height, optical sensor, moisture dirty, moisture unplugged, etc..)
2. Implemented additional accelerometer filtering for tilt compensation.
3. Fixed a header switch bug, where the header orientation was not being saved on a power cycle.
4. Designed to be used with Epro version 3.8 or greater.

VERSION 2.0.18

1. INITIAL RELEASE.
